

Venkata Swamy 'Kalyan' Nakka

2nd year PhD Student, SPIES Research Lab
Department of Computer Science & Engineering
Texas A&M University, College Station, TX 77843

☎ 361-516-7796
✉ kalyan@tamu.edu
🌐 [kalyan-nakka](https://kalyan-nakka.github.io)

Research Interests

Adversarial Machine Learning and AI Security.

Education

Texas A&M University <i>Ph.D. in Computer Science</i> <i>Advisor: Dr. Nitesh Saxena</i>	Jan. 2024 – Present
Texas A&M University–Kingsville <i>M.S. in Computer Science</i> <i>Advisor: Dr. Habib M. Ammari</i>	Aug. 2021 – May 2023
Indian Institute of Technology – Dhanbad, India <i>B.Tech. in Mechanical Engineering</i> <i>Advisor: Dr. L. A. Kumaraswamidhas</i>	Jul. 2012 – Apr. 2016

Academic & Professional Experience

Texas A&M University <i>Graduate Assistant – Research</i>	Jan. 2024 – Present
Texas A&M University–Kingsville <i>Graduate Research Assistant</i> <i>Graduate Teaching Assistant</i>	Aug. 2022 – May 2023 Jan. 2022 – Jul. 2022
Soroco, India <i>Senior Software Engineer</i>	Sep. 2019 – Jul. 2021
Infosys, India <i>Senior Software Engineer</i> <i>Software Engineer</i>	Nov. 2018 – Aug. 2019 Nov. 2016 – Dec. 2018

Honors & Achievements

Distinguished Student Award Awarded to only 1 graduate student per semester at Texas A&M University–Kingsville (University level)	2023
Dean's Merit Scholarship for exceptional academic performance Awarded to top 2% of Engineering graduate students at Texas A&M University–Kingsville (College level)	2022
Computer Science Graduate Scholarship for exceptional academic performance Awarded to top 5% of CS Graduate students at Texas A&M University–Kingsville (Department level)	2021

Rockwell International Scholarship for exceptional academic performance Awarded to top 2% of International graduate students at Texas A&M University– Kingsville (Department level)	2021
Insta Award Infosys, India	2018
IIT MCM Scholarship for exceptional academic performance Awarded to top 20% of Undergraduate students at IIT Dhanbad (University level)	2013–2016
All India Rank 10760 (98.2 %ile) Indian Institute of Technology Joint Entrance Examination (IIT-JEE) Entrance exam for IISc & IITs	2012
All India Rank 8076 (99.2 %ile) All India Engineering Entrance Examination (AIEEE) Entrance exam for NITs	2012

Publications

Peer-Reviewed Conference Papers

- [C3] Field demonstration of Blockchain-based security for a Solar Farm
BoHyun Ahn, **Kalyan Nakka**, Nathaniel Handke, Trevor Reyna, Taesic Kim
ECCE – IEEE Energy Conversion Congress and Exposition, 2024
- [C2] Post-Quantum Cryptography (PQC)-Grade IEEE 2030.5 for Quantum Secure Distributed Energy
Resources Networks
Kalyan Nakka, Seerin Ahmad, Logan Atkinson, Taesic Kim, Habib M. Ammari
ISGT – IEEE PES Innovative Smart Grid Technologies, 2024
- [C1] Square Tessellation for Stochastic Connected k -Coverage in Planar Wireless Sensor Networks
Kalyan Nakka, Habib M. Ammari
ISCC – IEEE Symposium on Computers and Communications, 2023

Peer-Reviewed Journal Articles

- [J4] Hierarchical Deployment and Square Tessellation for Connected k -Coverage in Heterogeneous
Planar Wireless Sensor Networks
Kalyan Nakka, Habib M. Ammari
ACM TOSN – ACM Transactions on Sensor Networks, 2025
- [J3] Blockchain-assisted Resilient Control for Distributed Energy Resource Management Systems
Seerin Ahmad, **Kalyan Nakka**, BoHyun Ahn, Taesic Kim, Dongjun Han, Dongjun Won
ACCESS – IEEE Access, 2024

Preprints

- [P4] BitBypass: A New Direction in Jailbreaking Aligned Large Language Models with Bitstream Camouflage
Kalyan Nakka, Nitesh Saxena
- [P3] LiteLMGuard: Seamless and Lightweight On-Device Prompt Filtering for Safeguarding Small Language Models against Quantization-induced Risks and Vulnerabilities
Kalyan Nakka, Jimmy Dani, Ausmit Mondal, Nitesh Saxena
- [P2] Is On-Device AI Broken and Exploitable? Assessing the Trust and Ethics in Small Language Models
Kalyan Nakka, Jimmy Dani, Nitesh Saxena
- [P1] Breaking Indistinguishability with Transfer Learning: A First Look at SPECK32/64 Lightweight Block Ciphers
Jimmy Dani, **Kalyan Nakka**, Nitesh Saxena

Research Experience

SPIES Research Lab, Texas A&M University

Jan. 2024 – Present

- ***Risks and Vulnerabilities in On-Device Small Language Models:***
In this study, we exploited well-established trust and ethics assessments for understanding the risks and vulnerabilities in on-device Small Language Models (SLMs) deployed on smartphones. The results illustrated the significant high risks of stereotypical bias, unfairness, privacy-breaching behavior and harmful response generation of on-device SLMs. Further, we demonstrated the vulnerabilities of these on-device SLMs using vanilla prompts depicting various harmful scenarios.
- ***Safeguarding On-Device Small Language Models:***
In this work, we developed a practical on-device deployable lightweight deep learning (DL)-based prompt guard for safeguarding Small Language Models (SLMs) against quantization-induced risks and vulnerabilities, by characterizing a novel threat model called *Open Knowledge Attack*. The results illustrated that our prompt guard secures on-device SLMs effectively and efficiently in terms of safety and latency assessments. Further, we demonstrated the mitigation of these vulnerabilities by our prompt guard.
- ***Jailbreaking Aligned Large Language Models:***
In this study, we demonstrated the effectiveness of novel vulnerability, called bitstream camouflage, in jailbreaking aligned Large Language Models (LLMs). The results illustrate the high effectiveness of this vulnerability in jailbreaking aligned LLMs in terms of adversarial performance, generating phishing content, and bypassing guard models.

CPPEs Lab, Texas A&M University–Kingsville

Aug. 2022 – May 2023

- ***Blockchain-based Cybersecurity for Photovoltaic Systems:***
We designed a Blockchain-based Cybersecurity platform for securing Photovoltaic systems against control-command and firmware-update attacks from adversaries, and developed a testbed for demonstrating defense against various real-time attack scenarios.
- ***Post Quantum Cryptography (PQC) grade Distributed Energy Resources Networks:***
Our study designed a Post Quantum Cryptography (PQC) grade IEEE 2030.5 network architecture for Distributed Energy Resources (DERs), and developed a testbed for understanding the performance of various PQC cipher suites. Also, we demonstrated real-time monitoring and control of DERs using our proposed PQC-grade IEEE 2030.5 network.
- ***Blockchain-assisted Resilient Control for Distributed Energy Resource Management Systems:***
In this study, we designed a Blockchain-based resilient control mechanism for DER Management Systems (DERMS), such that monitoring and control of DERs will be not affected by failure of

DERMS. We developed a testbed for demonstrating the effectiveness of our proposed resilient control mechanism for real-time voltage and frequency control recovery scenarios.

WiSeMAN Research Lab, Texas A&M University–Kingsville

Aug. 2022 – May 2023

- ***Development of fault-tolerant and energy-efficient 2D Wireless Sensor Networks using Square Tessellation:***
We designed a Square Tessellation-based connected k -coverage theory and developed centralized protocols k -CSqu (deterministic), St- k -CSqu (stochastic) and Het- k -CSqu (heterogeneous) for 2D Wireless Sensor Networks, that ensures fault-tolerant coverage and energy-efficient network operation.
- ***Development of fault-tolerant and energy-efficient 2D Wireless Sensor Networks using Irregular Hexagonal Tessellation:***
In this study, we designed an Irregular Hexagonal Tessellation-based connected k -coverage theory and developed centralized protocols k -InDi (deterministic) and St- k -InDi (stochastic) for 2D Wireless Sensor Networks, that ensures fault-tolerant coverage and energy-efficient network operation.
- ***Development of fault-tolerant and energy-efficient 3D Wireless Sensor Networks using Cubic Honeycomb:***
This work designs a Cubic Honeycomb-based connected k -coverage theory and develops centralized protocol 3D- k -CuHon for 3D Wireless Sensor Networks, that ensures fault-tolerant coverage and energy-efficient network operation.

Teaching Experience

Guest Lecture, Texas A&M University–Kingsville

- CSEN 5303: Industrial Control Systems Security Spring 2023

Teaching Assistant, Texas A&M University–Kingsville

- CSEN 5303: Massive Parallel Computing Summer 2022
- CSEN 5303: Foundations of Computer Science Spring 2022

Invited Talks

Can Geometry Solve Complex Computer Science Problems? Feb. 2023
Graduate Science and Engineering Research Colloquium Series
Texas A&M University–Kingsville, TX

Potential Quantum Computing Attacks on Distributed Energy Resources and Post-Quantum Cryptography grade IEEE 2030.5 Dec. 2022
SunSpec Alliance Annual Meeting (Virtual)
Las Vegas, NV

Fellowships

Graduate Research Assistantship (US \$12,000 p.a.) 2024–2025
Texas A&M University

Graduate Research Assistant Scholarship (US \$6,000 p.a.) 2022–2023
Texas A&M University–Kingsville

Dean's Merit Scholarship (US \$1,000 p.a.) 2022–2023
Texas A&M University–Kingsville

Graduate Assistant Scholarship (US \$8,500 p.a.) 2021–2023
Texas A&M University–Kingsville

HEERF III Student Scholarship (US \$1,600 p.a.) <i>Texas A&M University–Kingsville</i>	2021–2022
Computer Science Graduate Scholarship (US \$1,000 p.a.) <i>Texas A&M University–Kingsville</i>	2021–2022
Rockwell International Scholarship (US \$1,000 p.a.) <i>Texas A&M University–Kingsville</i>	2021–2022
MCM Scholarship (IND ₹72,000 p.a.) <i>Indian Institute of Technology – Dhanbad</i>	2013–2016
